DETAILED ACTION

Response to Amendment

In response to the amendment filed 12/18/2003, claims 1, 3-5, 8, 10-12, and 15 are amended, claims 2, 9, and 18 cancelled, and claims 19-23 added. Claims 1, 3-8, 10-17, and 19-23 are pending.

Allowable Subject Matter

Claims 1, 3-8, 10-17, and 19-23 are allowed. The following is an examiner's statement of reasons for allowance:

There is not taught or disclosed in the prior art an apparatus or method as claimed for producing uv light by frequency quadrupling a laser light. Particularly, there is not taught a cesium lithium borate (CLBO) crystal that is non-critically phase matched and cooled to a temperature of between -10 and -20 degrees centigrade. There is not taught or disclosed that the CLBO crystal will produce the particular output wavelength, or that it must be cooled as claimed.

Previously, the Examiner rejected the claims by asserting that the cooling may be done at such a level by the routine experimentation of one skilled in the art. The applicant's arguments on p. 9 of the response are persuasive in rebutting this argument. Further, due to its hygroscopic nature, the prior art only discloses CLBO crystals used at temperatures much greater than those particularly claimed herein, typically greater than 100 degrees centigrade. This factor, as well as the fact that there are other variables in determining the optimum temperature, lead the Examiner

Art Unit: 2828

to agree that it would require undue experimentation for one skilled in the art to cool this particular crystal as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments, filed 12/18/2003, with respect to the amended claims have been fully considered and are persuasive. The rejections have been withdrawn.
